

AlumiRamp

AlumiRamp

bridging the gap.

AlumiRamp designs, manufactures, and delivers a full line of ramping designed to promote active lifestyles for people with disabilities. AlumiRamp pioneered the modular aluminum ramp system in 1986 and now offers four lines to meet your exact needs, from the smallest threshold to the highest porch. AlumiRamp delivers quality, service, and dependability with all of our products proudly made in the USA.

AlumiRamp specializes in all types of code issues from ADA and ANSI to BOCA and IBC. We are happy to advise you on any code questions you may have and discuss which system will meet your needs.

- complies with ANSI and ADA
- 5 year warranty
- assembles easily with a ½" wrench
- revolutionary insert design – no set screws or rivets required
- legs can be recessed under the system for a clean look
- all anodized aluminum – will not chip, flake, or rust
- heavy duty welded aluminum construction
- bi-directional knurled tread forms a rugged skid resistant surface that cannot wear off
- fully adjustable height and slope
- all stainless steel fasteners
- universal platforms

A*COM

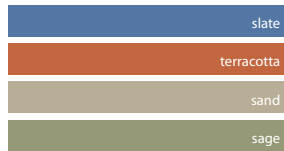

The A*COM SYSTEM has been developed to meet the more stringent code demands of IBC and BOCA building codes. It is fully customizable, and can be configured to meet other specialized building codes as required. The simple, modular design insures easy set-up and the ability to reconfigure and relocate the system.

- complies with: IBC, BOCA, SBCCI, CABO, Florida SREF, ANSI, ADA
- 10 year warranty
- non-combustible
- heavy duty welded aluminum construction
- bi-directional knurled tread forms a rugged skid resistant surface
- 3 handrail options: 42" guardrail, 38" handrail, 38" 2 line rail

bridging the gap.

READY RAMP

The READY RAMP offers excellent portability and compactness where longer lengths are required. This model unfolds to its full size in 3 easy steps and has recessed hinges so the ramp surface is free of obstructions. Construction is welded aluminum with a black non-skid surface.

TELESCOPIC CHANNEL RAMP

The TELESCOPIC CHANNEL RAMP is constructed of lightweight anodized aluminum with a black non-skid surface for traction. Useful for wheelchairs and some scooters, the Telescopic Ramps have a wide 7½" usable track. Each channel extends to nearly double its length for fast and easy set up.

RUBBER THRESHOLD RAMP THRESHOLD RAMP

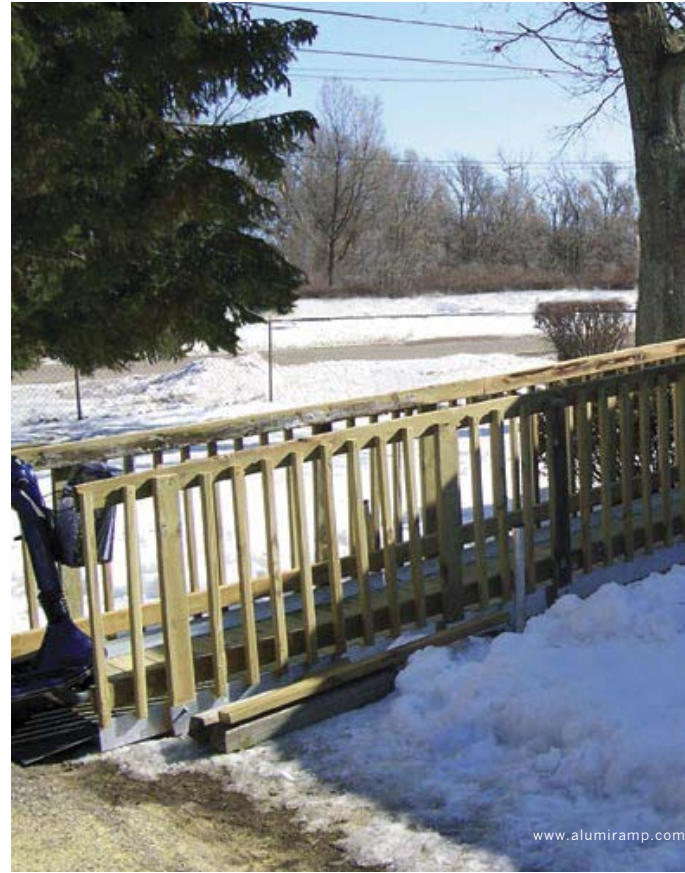

The RUBBER THRESHOLD RAMP from is made of recycled rubber and can be used for thresholds up to 2½". This design is especially useful for sliding doors or doors that fit tightly in their frame as it does not cross the threshold. All sizes come with tapered edges and a molded slip resistant surface.

The low profile aluminum THRESHOLD RAMP is ideal for use at doorways and thresholds from 1" to 4" in height. The 2" top lip seamlessly covers the existing threshold for a smooth transition and adjusts to varying heights. The welded construction and permanent skid resistant surface allow these ramps to be used inside or outside.

QUICK RAMP SYSTEM

AlumiRamp's QUICK RAMP SYSTEM is a pre-engineered kit designed to combine the economic savings of wood with the strength and ease of our modular aluminum systems. With these kits, an individual can quickly and easily build and install a full ramp system. Instructions are included that provide ADA guidelines, handrail options, and cut lists for the required lumber. A truly economical option that is easier than designing from scratch in all wood.
